

MobileCheck Plus

A Comprehensive Solution for Mobile Phone Forensics

MobileCheck Plus is an all-in-one forensic solution for various types of mobile devices. It is a ready to use forensic suite, pre-installed with all the required software and hardware. The user can directly do forensic analysis of phones, without installing any additional software. It supports complete and instant analysis of variety of phone brands and models. The speciality of the product is that it can be used as a field kit enabling the first responders in extracting and analysing important information which may be lost, by the time the exhibits reach the lab, after completing the legal procedures.
